DETAILED ACTION

1. This action is in response a requirement filed April 1, 2005. This application is a divisional application of serial number 09/612,354 filed July 7, 2000, now US patent 6,684,722 issued February 3, 2004. Claims 1-71 are pending. Applicant's election of the claims of Figure 4 without traverse is noted. Nonelected claims 11-30, and 57-61 are withdrawn from consideration as readable on the nonelected species of Figures 1, 2, 3, 5, 6, 9, 10, 13, 14, and 16. Applicant is asked to maintain a clear line of demarcation between the subject matter of the parent patent application and the instant application. Applicant is asked to list any claims readable on Figure 4. An action on the merits of claims 1-10, 31-56 and 62-71 is included in this Office action.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/756,917

Art Unit: 3753

3. Claims 1, 3-10, 31, 37-56 and 71 are rejected under 35 U.S.C. 102(b) as being anticipated by Simmons. Note the plurality of apertures valved by the interrupter 46.

Claim Rejections - 35 USC § 103

Page 3

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. The factual inquiries set forth in *Graham v. John Deere Co., 148 USPQ 459*, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or unobviousness.
- 6. Claims 2, 32-36 and 62-70 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kenyon et al in view of Bernardi. Kenyon et al disclose the claimed invention except for the recitation of the valve for the gyroscope of Kenyon et al is a rotary multi-way valve as taught by Bernardi. It would have been

Art Unit: 3753

obvious to one having ordinary skill in the art at the time the invention was made to substitute for the valve (Figure 2, lines 19+) as taught by Bernardi et al (Figure 1) in order to provide more effective control of the aircraft pressure actuating fluid.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patents to Malina et al and McPherson are of particular interest.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. Michael Chambers whose telephone number is 571-272-4908. The examiner can normally be reached on Mon-Thur. 6:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gene Mancene can be reached on 571-272-4930. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
